Summary

Motivated computer Science student with practical experience in HTML, CSS, and JavaScript. Passionate about front-end development, building responsive UI, and improving user experience. Continuously learning modern web technologies and seeking internship opportunities to apply skills in real-world projects

Education

Bachelor of Technology — Computer Science and Engineering
Parul University – CGPA 7.4

2023-2027

Skills:

- Fronted: HTML, CSS, JS
- Programming: python
- Version Control: Git & GitHub

Projects:

Portfolio Website (HTML & CSS)

I designed and developed a fully responsive personal portfolio website using HTML and CSS. The website includes clean UI sections, structured layout, and smooth visual flow to showcase my skills, projects, and contact information. I followed modern HTML5 and CSS3 best practices to ensure proper alignment, spacing, and responsiveness across different screen sizes.

Login page

I developed a clean and modern login page interface using HTML and CSS. The page includes neatly styled input fields, buttons, and form elements with proper alignment. I ensured that the design is fully responsive and user-friendly, with clear readability and simple styling that enhances the overall user experience.

Task Manager

Developed a fully functional task management web application using HTML, CSS, and JavaScript. The application allows users to add, delete, and manage daily tasks efficiently with a clean and responsive user interface. Implemented priority-based task organization to help users categorize and focus on important tasks. Integrated local storage to ensure tasks are saved and persist even after page refresh or browser restart.

OTHER ACTIVITIES

- Continuous self-learning through online tutorials
- Interest in front-end development, UI/UX, and modern web design
- Exploring GitHub documentation & coding challenges
